

PRIYA ZINZUVADIA

ASPIRING DEVOPS & CLOUD ENGINEER

+91 8460020240 | priyazinzuvadia55@gmail.com | [Priya Zinzuvadia \(LinkedIn\)](#)

BSc IT (Cloud Computing) student at Gujarat University with hands-on experience in cloud infrastructure, DevOps practices, and full-stack development. Completed an internship at GRRAS IT Solutions deploying containerized applications on AWS and managing Linux-based environments. Certified AWS Academy Cloud Foundations graduate. Eager to contribute to a forward-thinking team building reliable, scalable, and automated cloud solutions.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC), Linux

DevOps & Automation: Docker, Docker Compose, Git, GitHub Actions, basic Terraform

Development: React.js, PHP, MySQL, HTML, CSS

Soft Skills: Problem Solving, Communication, Fast Learner, Team Collaboration

PROFESSIONAL EXPERIENCE

GRRAS IT SOLUTIONS PVT LTD.

Feb 2026 – Mar 2026

Cloud & DevOps Intern

- Deployed and managed Linux-based virtual machines on AWS EC2; configured IAM roles, security groups, and VPC networking for secure access.
- Containerized a sample web application using Docker, reducing environment inconsistencies across dev and staging setups.
- Automated routine server health-check scripts using Bash, improving team response time on infrastructure alerts.
- Gained practical exposure to CI/CD concepts using GitHub Actions for automated build and deployment pipelines.

PROJECTS

Presento – E-Commerce Gifting Platform | *React.js · PHP · MySQL · AWS S3*

- Built a full-stack gifting platform with personalized gift recommendations, custom hamper creation, and secure payment integration.
- Hosted static assets on AWS S3 and configured the deployment pipeline using GitHub Actions for automated releases.
- Designed the MySQL schema and REST API endpoints in PHP, supporting 500+ product entries with search and filter functionality.

Multi-Tier Containerized Portfolio Platform | *React.js · PHP · MySQL · Docker · Docker Compose · RHEL · Git*

- Architected and deployed a 3-tier web application (React frontend, PHP REST API, MySQL database) fully containerized using Docker and orchestrated via Docker Compose on RHEL.
 - Configured custom bridge networks for isolated inter-container communication and managed volume mappings for persistent database storage across container lifecycles.
 - Defined custom port bindings (8080/8000) and automated environment setup using shell scripts, simulating a production-grade local deployment workflow.
-

EDUCATION

BSc. IT (Cloud and Application Development)

GUCPC, Gujarat University, Ahmedabad

Aug 2023 – Jun 2026 (Completed)

HSC

Shri Hari Higher Secondary School, Amreli

March 2023

ACHIEVEMENTS

- [AWS Academy Graduate – Cloud Foundations \(Badge verified via Credly\)](#)
- Completed hands-on labs covering EC2, S3, IAM, VPC, RDS, and cloud security fundamentals
